

 By Marc Lou

Learn to code **in weeks, not months**

Everything you need to build your SaaS or any online business—even as a complete beginner.

Get instant access

2,786 entrepreneurs love the course

Day 1

Learn the fundamentals of coding

Day 4

Log in users and save in database

Day 9

Set up subscription payments

Day 14

Launch your idea!

Coding courses are designed for *software engineers*, not *entrepreneurs*

Coding as an employee

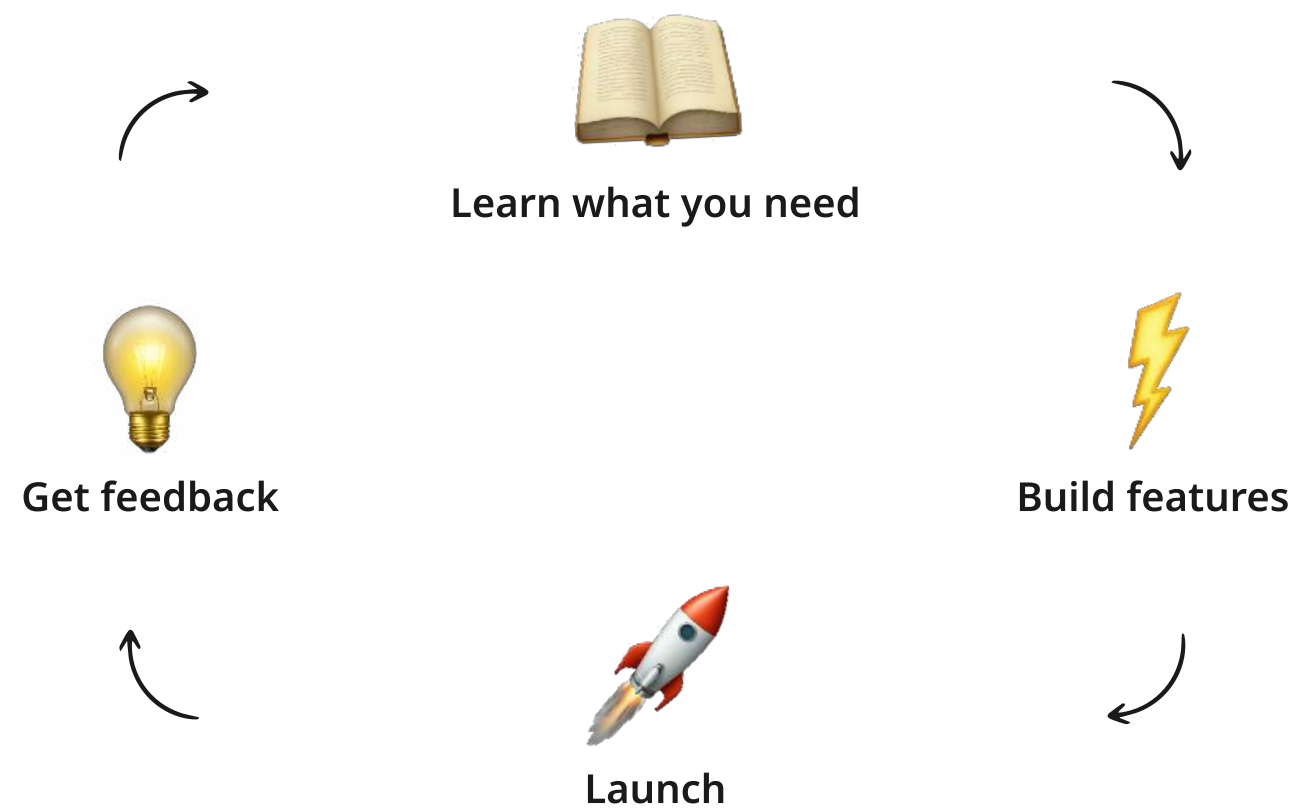

- Invert binary trees
- Master 47 sorting algorithms you'll never implement
- Memorize Big O notation to impress your interviewer
- Read documentation longer than The Lord of the Rings
- Write complex code when a simple AI prompt would do

Coding as an entrepreneur

- Learn only the fundamentals
- Use AI to code for you
- Keep learning on the fly

🚫 Instead of watching 100 hours of "JavaScript Basics" videos...

Start a learning flywheel

Code like an entrepreneur — build your idea in 14 days to get real-world feedback and keep learning as you go.

From 0 to SaaS in 12 hours of video

Everything you need to build an online business, even if you have no experience

15 minutes

1. The Mindset

Learn to code as an entrepreneur, not an employee

- ✓ How to ship products fast
- ✓ How to make money with code
- ✓ Finding motivation to build

1 hour 15 minutes

2. The Fundamentals

Everything important about web development so you know how to tell the AI what to code for you

- ✓ How the internet works (HTTP, domain names)
- ✓ HTML
- ✓ CSS
- ✓ JavaScript

10 hours 26 minutes

3. Your First SaaS

Build and launch a real SaaS business that makes money

 FRONTEND DEVELOPMENT

- ✓ Next.js application
- ✓ UI/UX design
- ✓ Images
- ✓ Responsive design

- ✓ React components
- ✓ SVG & icons
- ✓ Links
- ✓ Buttons

- ✓ Tailwind CSS
- ✓ Copywriting essentials
- ✓ Dynamic pages
- ✓ Form inputs

 BACKEND & AUTHENTICATION

- ✓ Magic link authentication
- ✓ API routes
- ✓ Data structures

- ✓ Google OAuth login
- ✓ Backend VS. Frontend
- ✓ Private user dashboard

- ✓ Database with MongoDB
- ✓ Cookies

 BUSINESS & DEPLOYMENT

✓ Stripe subscriptions	✓ LemonSqueezy subscriptions	✓ Emails
✓ Domain names	✓ DNS	✓ Server hosting
🔧 DEVELOPER TOOLS & SKILLS		
✓ SEO <i>(coming soon)</i>	✓ AI-powered coding 🤖	✓ Git & GitHub
✓ Node.js	✓ AI-powered design 🤖	✓ Security best practices
✓ npm	✓ Terminal	✓ VSCode extensions

”
I built my app in almost a week. I shared on all social, and I guess people liked it. I got **140 new users and 5 paying users (\$162.5)**
—Andrei Bogdan

Built [landingpro.ai](#), [uireplicator.com](#) & [instantseoaudit.com](#)

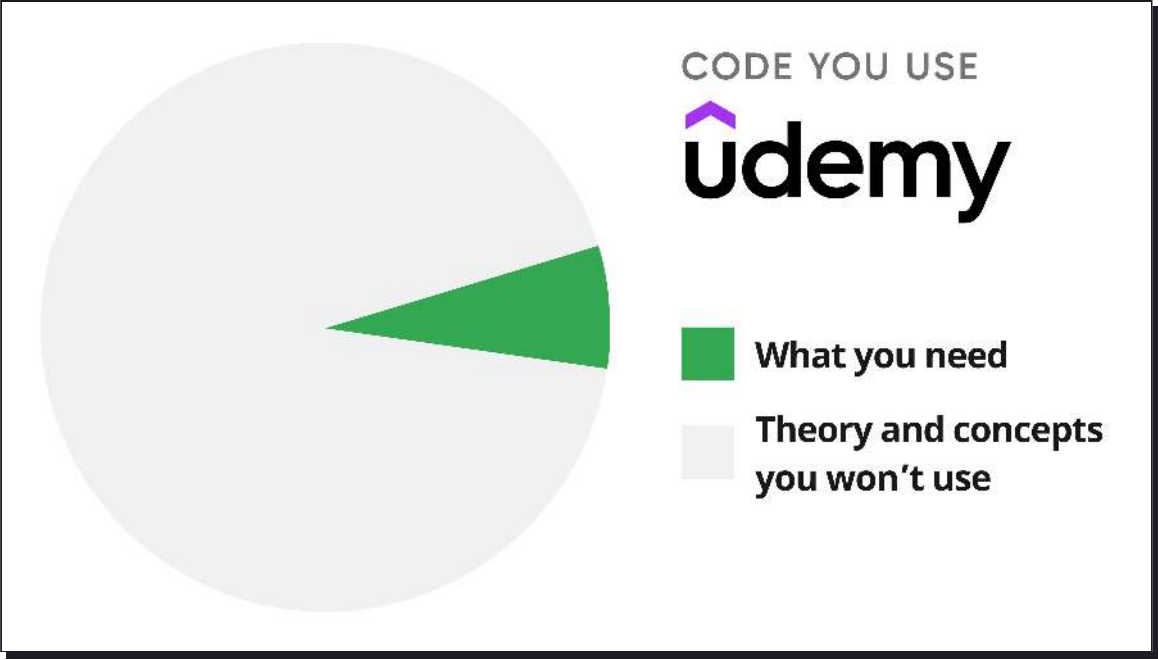

Wait... is it possible to learn *that* fast?

The average JavaScript course on Udemy is *64 hours*. To build a tiny business, you would also need:

- + 72 hours for React
- + 32 hours for MongoDB
- + 16 hours for Tailwind, etc...

But the truth is, you'll only use 20% of what you learn.

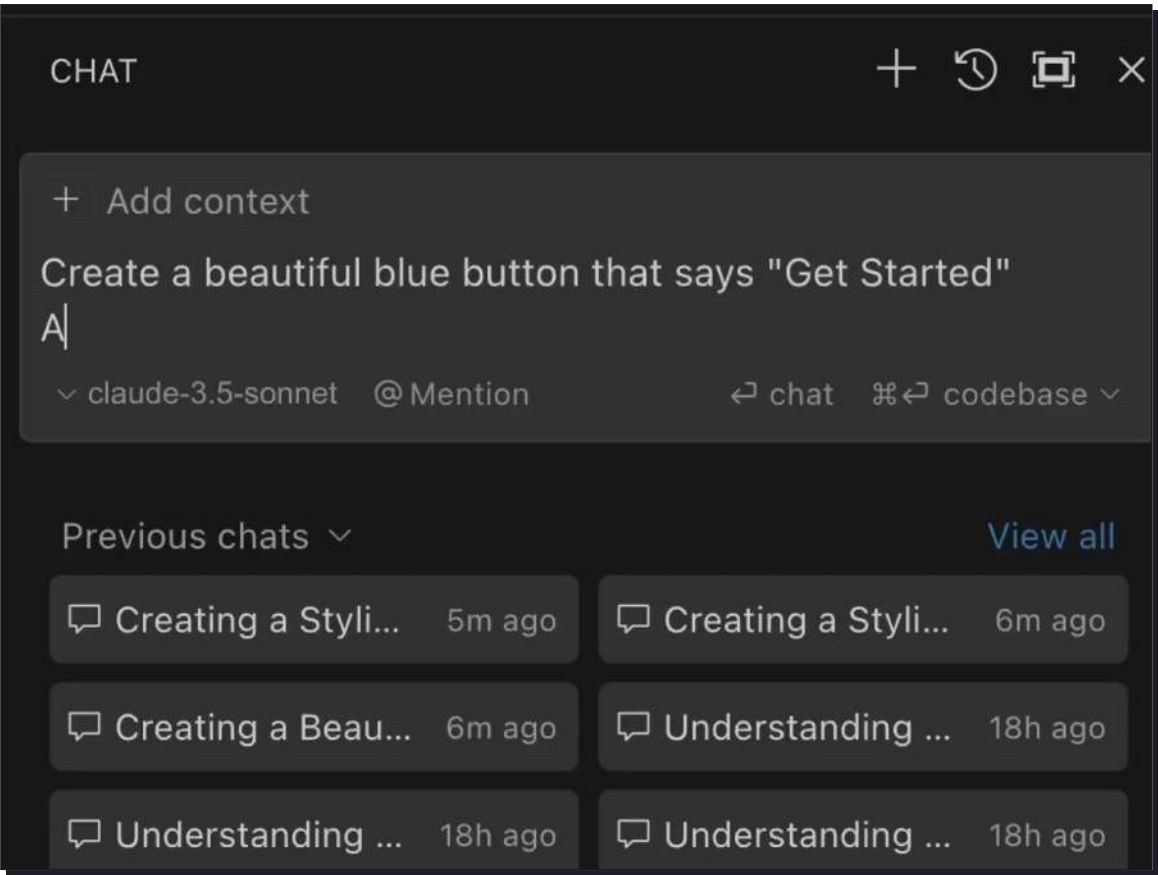

These courses prepare you for the competitive job market.

But as an entrepreneur?

You need just enough to build your idea!

In 2025, AI makes coding even easier. It explains code, fixes bugs, and writes sections of your app for you.

☀️ *AI gives you superpowers when you know the fundamentals*

You don't need to know how `CSS box-shadow` works to create a button... **Just ask the AI to do it for you!**

CodeFast teaches you how to code like an entrepreneur:

1. Learn the essentials (no fluff)
2. Use AI to build faster
3. Launch your idea

Learn in weeks, not years

2,786 entrepreneurs love the course

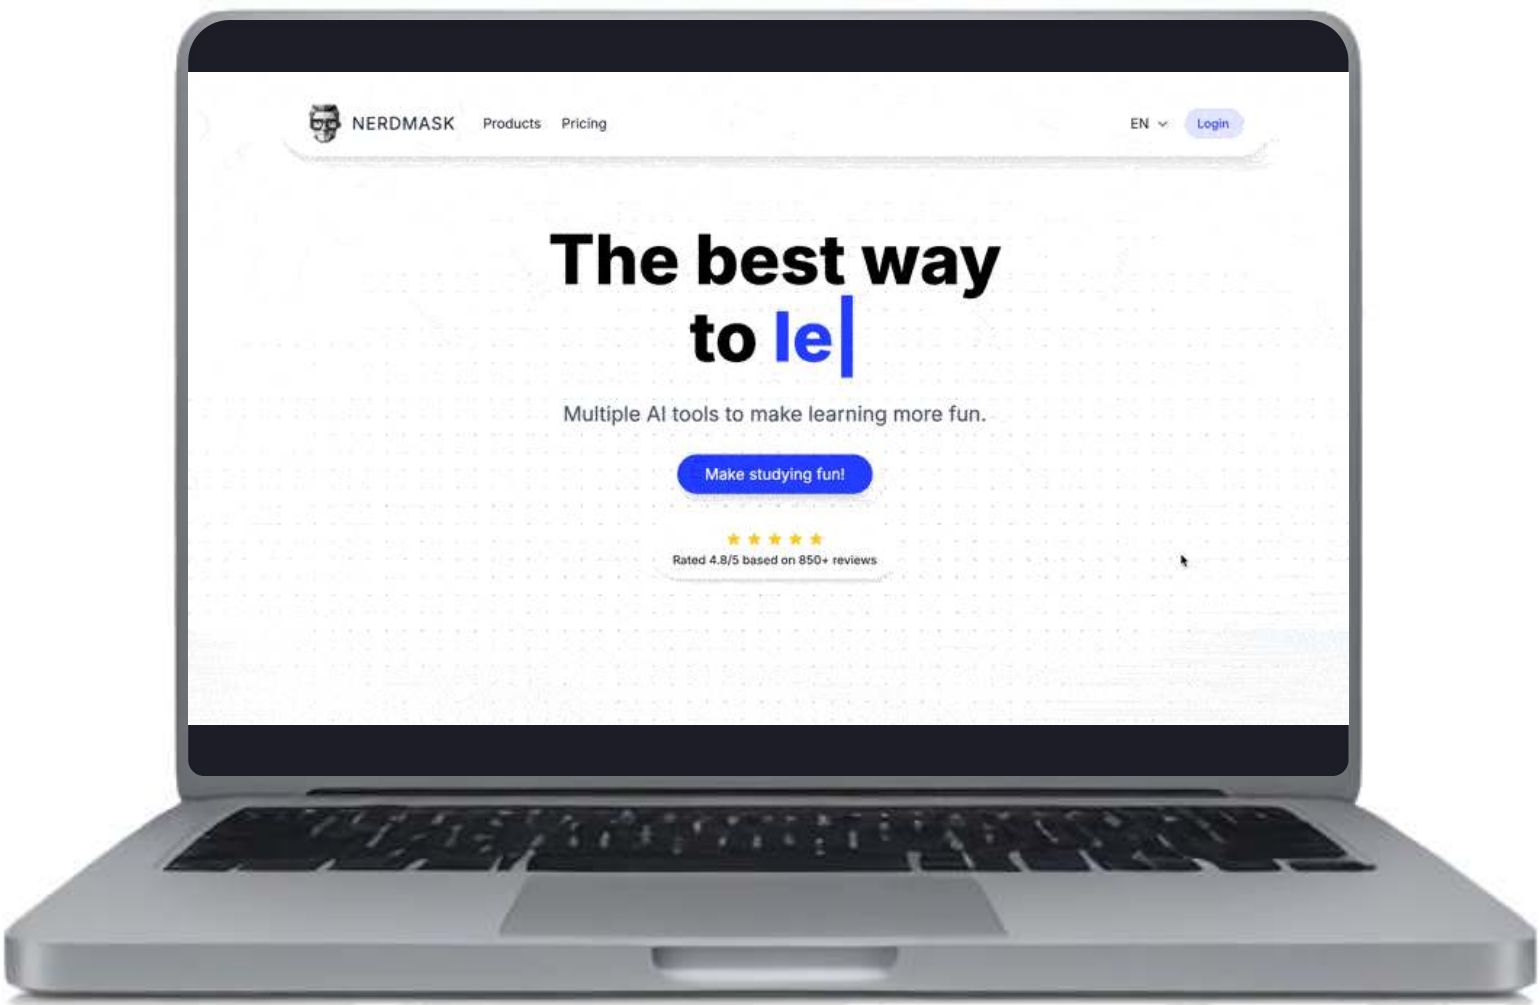

”

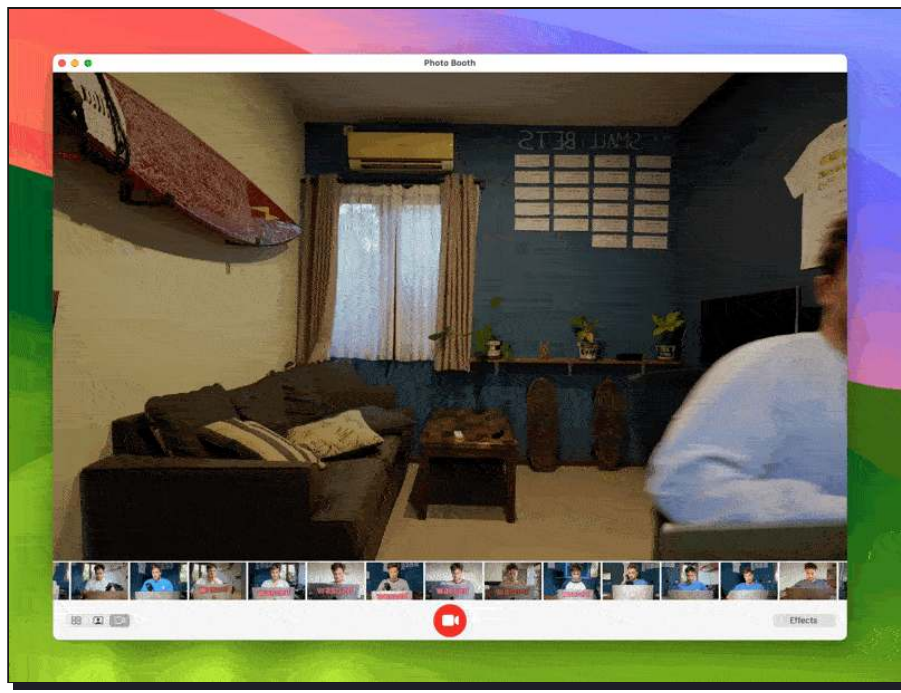

The startup I launched 3 weeks ago is now at \$400 in MRR! I love CodeFast, I could never find something so straight to the point and easy to learn.

—Juan Belmont

Built nerdmask.com

Hey it's Marc, your teacher 🙋

I was fired from school and university.

The way teachers taught was boring and impractical, so I didn't care.

In 2016, I faced the same issue trying to learn coding. **Courses were too long and made for people who want to get a job.** *I almost gave up...* 😞

So I skipped the theory, built tiny apps, and made my first \$1,000 online with a few lines of code.

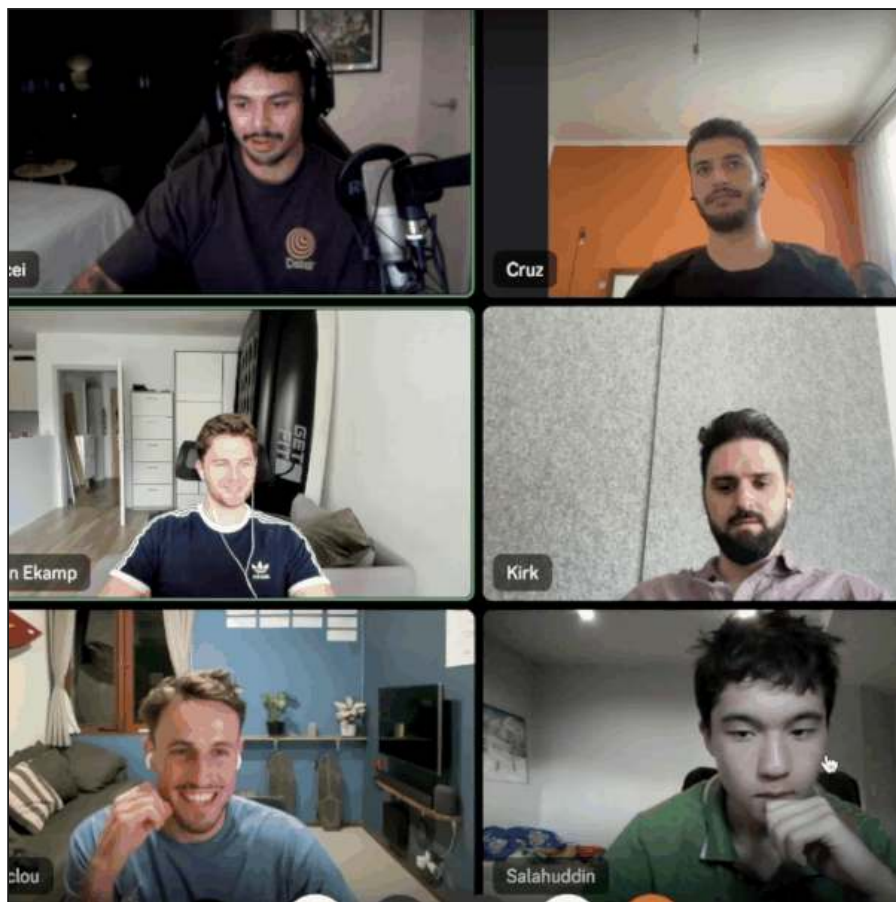

I realized I didn't need to know everything to create something useful.

Over time, I built **25 tiny businesses** and earned over **\$200,000** with my SaaS. Now, coding is even easier—AI writes and fixes code for you.

So I built CodeFast, the course I wish I had when I started:

1. Short lessons
2. Skip the fluff
3. Build real businesses

This course took **9 months** and was shaped by **50 students** in a beta. Some even **made money with their 1st app!** I hope you like it too.

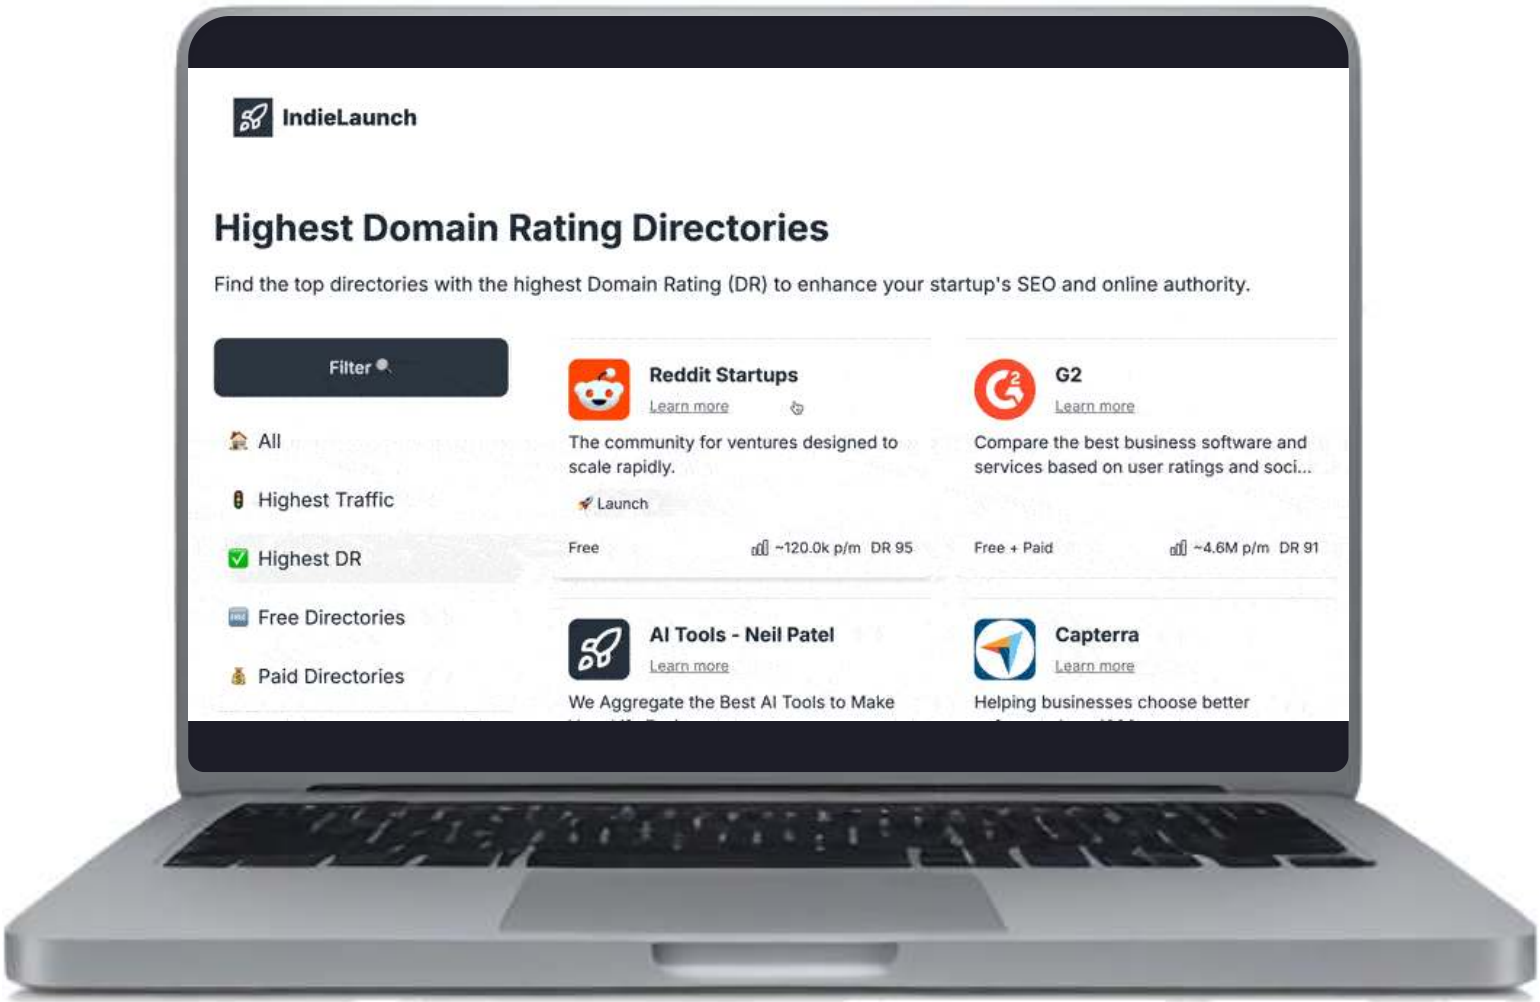

”

I've never finished Udemey courses... **Marc cuts the BS** and teaches you only the most important parts of coding.

—Adsy

Built indielaunch.ch & mrrbanner.com

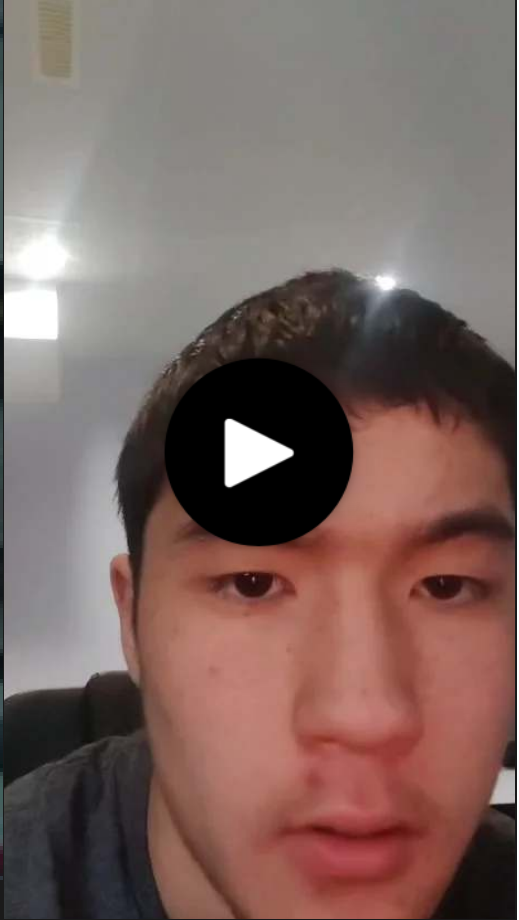

”

I tried learning web dev in the past but it was very tedious. I couldn't build a website... Marc goes straight to the point and **I built my first SaaS in 3 weeks.**

—Matthieu, built dicfast.com

2,786 students learned to code, fast

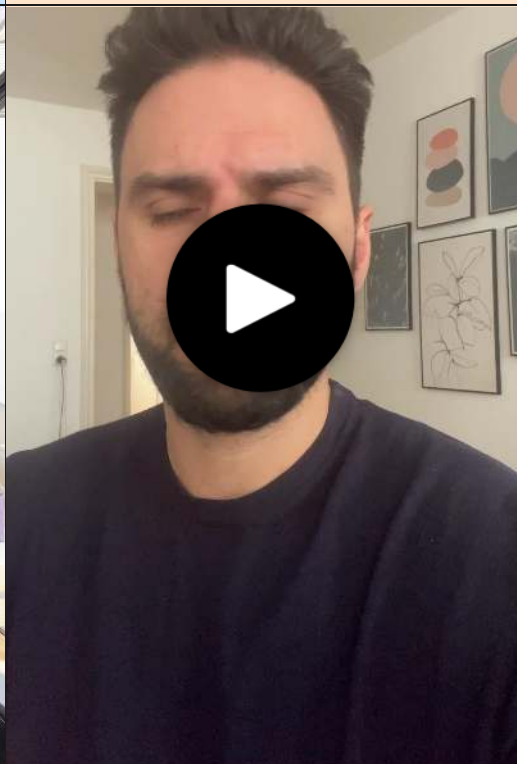

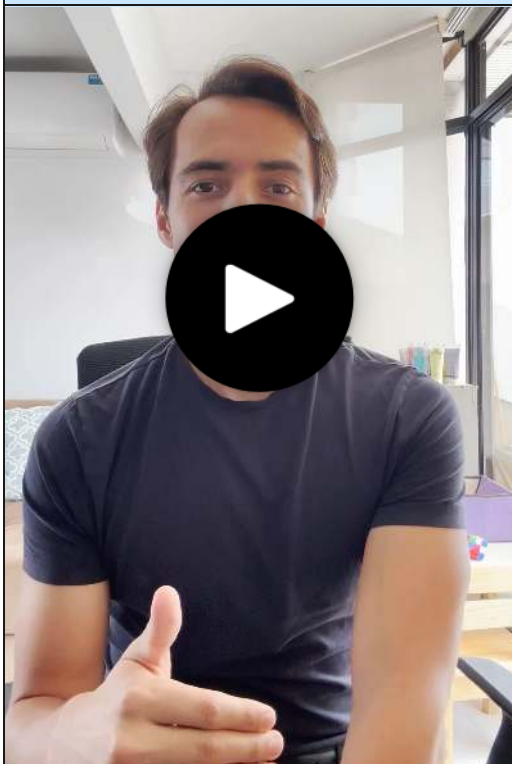

"I've never finished Udemey courses... Marc cuts the BS"	"I built my second app in a week"	"From knowing nothing to writing JavaScript"	"I built my first SaaS in 2-3 weeks"
"After CodeFast, I learned that coding is much faster and easier than I thought"			"I thought coding was hard, CodeFast changed that."

"Exactly what you need to build a small SaaS"

"I never found a course to become a startup founder"

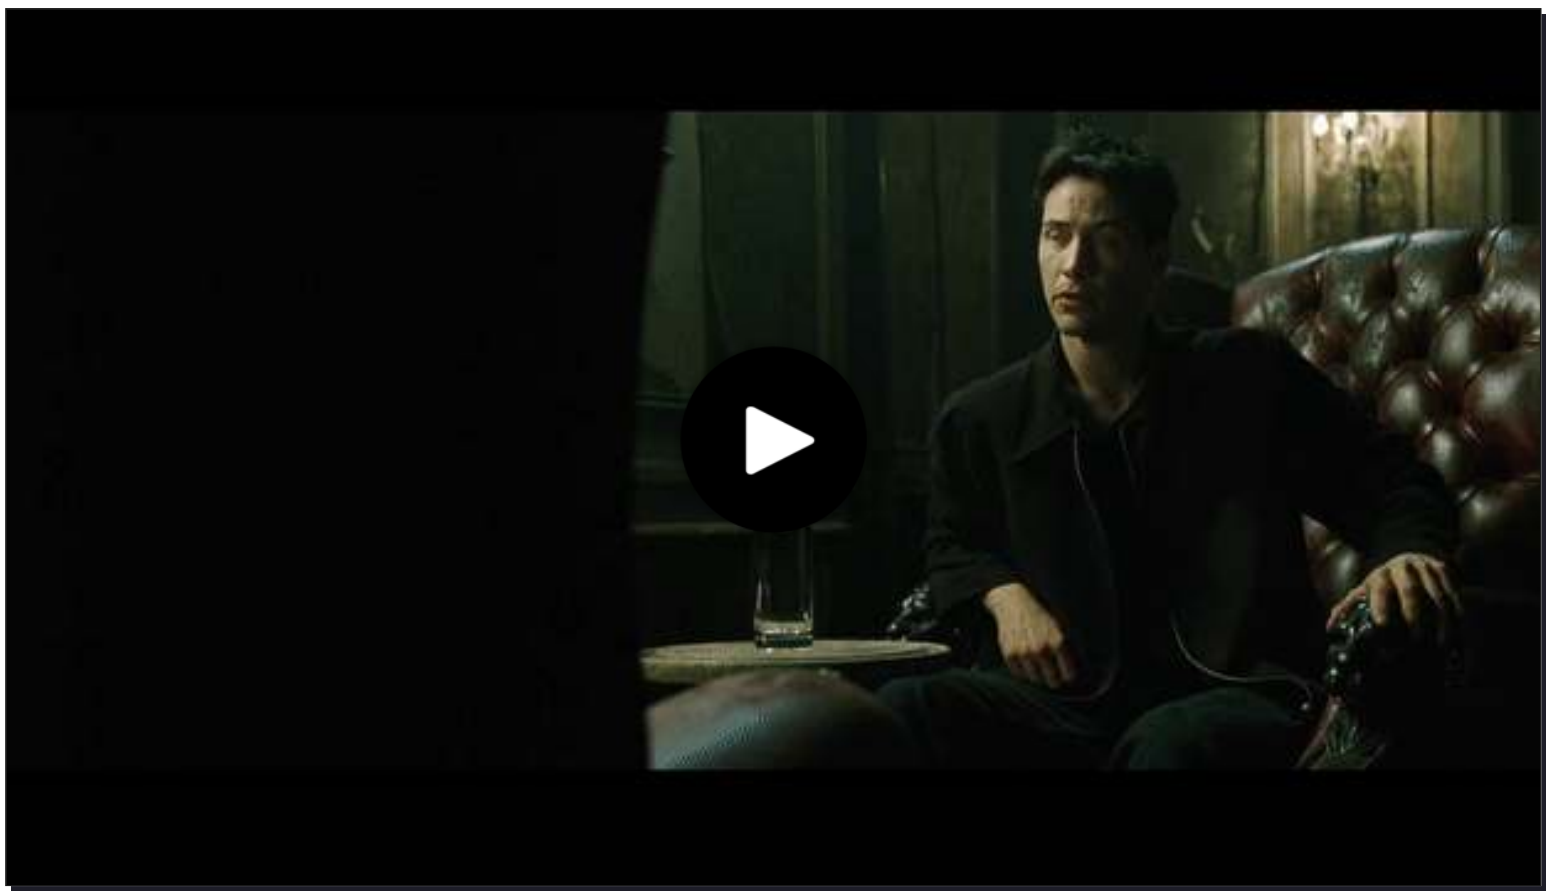

"CodeFast helped me build my micro-SaaS"

Spend years learning JavaScript complex topics, or...

Take the red pill 💊

2,786 students joined Neo

”

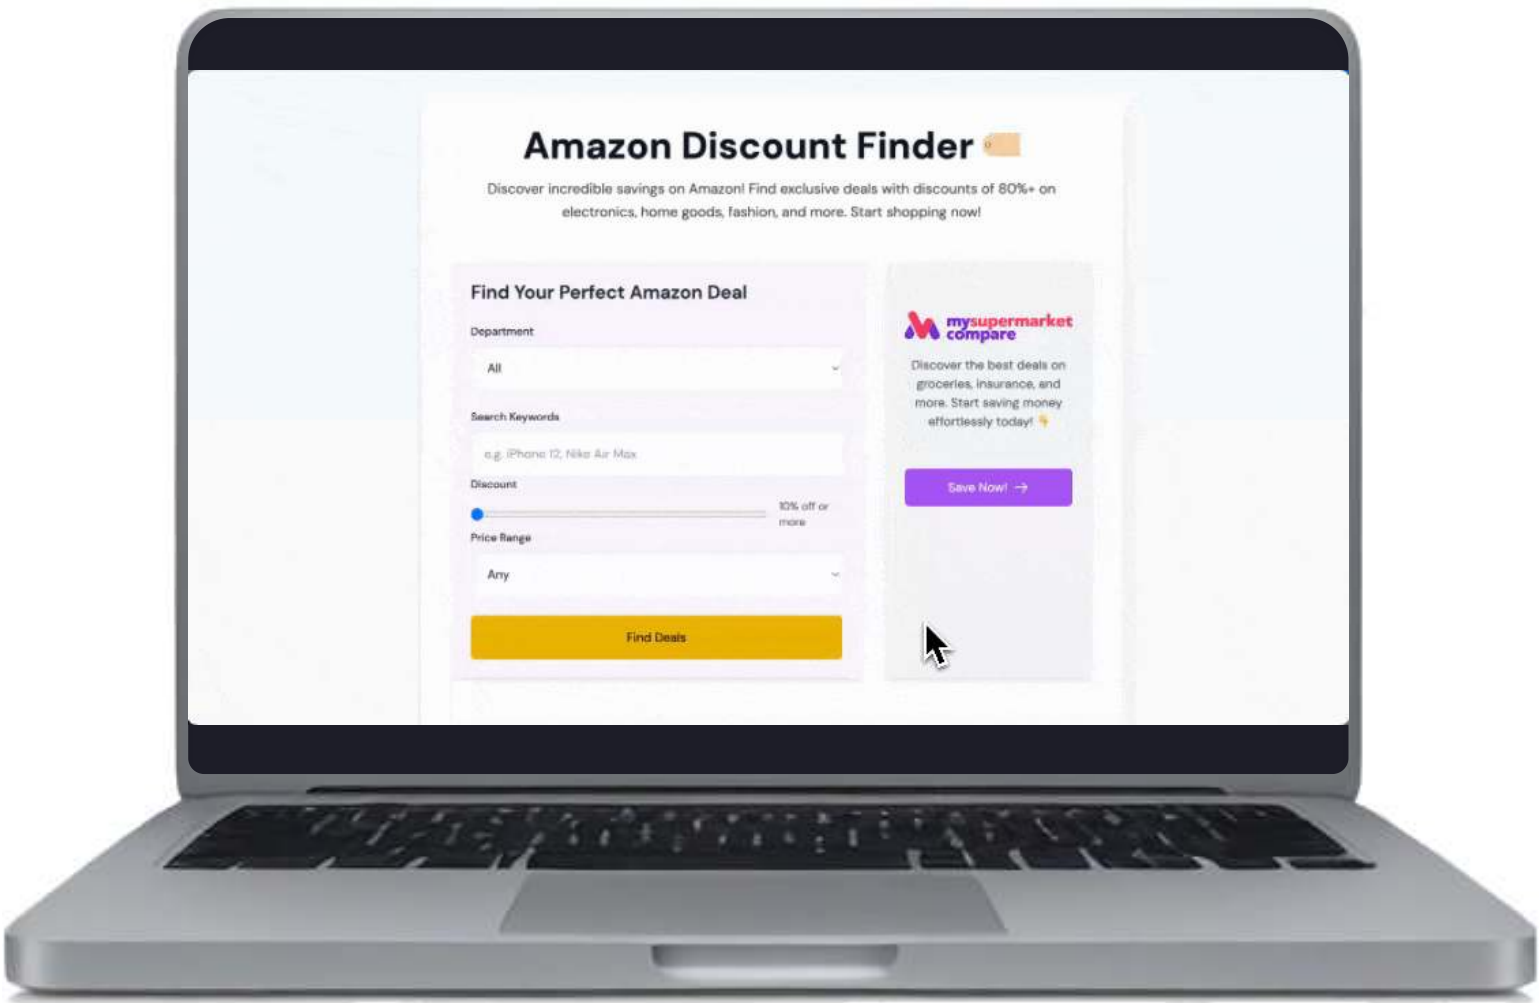

I started coding just a week ago and already shipped my first project.

I built a tool to find 80%+ discounts on Amazon, and my app just hit 8.7K visitors in the last 24 hours! 🤖
